

December 4, 2017

Dear Valued Customer,

To support our commitment to product satisfaction and patient safety, we are providing an official statement regarding frequently requested Safety Data Sheets (SDS) for many of the medical devices we manufacture.

While Safety Data Sheets (SDS) for the products listed below may have been provided in the past, they will no longer be available. These products are not considered hazardous and are stable in their finished form, as well as under prescribed storage and use conditions. Lancer's product labels and instructions for use (if applicable) contain sufficient information to use the products safely and effectively. The following products are considered to be non-hazardous and do not require a Safety Data Sheet (SDS):

Archwire markers	Orthodontic brackets and accessories
Alginates	Orthodontic instruments
Alginate flavorings	Lip guards
Aligner buttons	Patient relief wax / silicone
Bracket height gauge	Plastic sheets for thermoforming
Bite wafers	Positioner blanks
Elastics (latex & non-latex)	Retainer retrievers / appliance remover tools
Elastomerics (ties, chain, thread, rotation wedges, modules, arch wire tubing and sleeving).	Retractors
Expanders	Saliva ejectors
Impression protectors and trays	Separators
Mouth guards & brace guards	Tongue blocks
Orthodontic archwires	Prophy holders / sticks
Curing lights	Clear Aligner

Sincerely,

Richard Merrell
Regulatory Affairs / MarCom Manager
